Forma / Architecture

An editorial website concept for a fictional architecture studio.

The brief

Create a calm, purposeful website that gives architectural work space to breathe and makes the next step easy to find.

Design approach

An ivory and forest palette, large editorial typography, geometric architectural artwork and a responsive two-column composition.

What this demonstrates

Responsive HTML and CSS, clear hierarchy and an integrated portfolio preview. This is self-initiated concept work, not a client commission or a claim of commercial results.
